Lab Observations

EXPERIMENT - 15

Design a C program to organise the file using a two level directory structure.

PROGRAM:

```
#include <stdio.h>
#include <stdlib.h>

int main()
{
    char mainDirectory[] = "C:/Users/itssk/OneDrive/Desktop";
    char subDirectory[] = "os";
    char fileName[] = "example.txt";

    char filePath[200];
    char mainDirPath[200];

    snprintf(mainDirPath, sizeof(mainDirPath),
             "%s/%s/", mainDirectory, subDirectory);

    snprintf(filePath, sizeof(filePath),
             "%s%s", mainDirPath, fileName);

    FILE *file = fopen(filePath, "w");

    if (file == NULL)
    {
        printf("Error creating file.\n");
        return 1;
    }
```

```
    fprintf(file, "This is an example file content.");

    fclose(file);

    printf("File created successfully: %s\n", filePath);

    return 0;
}
```

OUTPUT:
