Lab Observations

EXPERIMENT - 2

Identify the system calls to copy the content of one file to another and illustrate the same using a C program.

PROGRAM:

```
#include <stdio.h>
#include <stdlib.h>
int main()
{
FILE *fptr1, *fptr2; char
filename[100], c;
printf("Enter the filename to open for reading \n");
scanf("%s", filename);
fptr1 = fopen(filename, "r");if
(fptr1 == NULL)
{
printf("Cannot open file %s \n", filename);
exit(0);
}

printf("Enter the filename to open for writing \n");
```

```
scanf("%s", filename);
fptr2 = fopen(filename, "w");if
(fptr2 == NULL)
{
printf("Cannot open file %s \n", filename);
exit(0);
}
c = fgetc(fptr1);
while (c != EOF)
{
fputc(c, fptr2); c
= fgetc(fptr1);
}

printf("\nContents copied to %s", filename);
fclose(fptr1);
fclose(fptr2);
return 0;
}
```

OUTPUT:

```
Enter the filename to open for reading
source.txt
Enter the filename to open for writing
destination.txt

Contents copied to destination.txt
--------------------------------
Process exited after 18.84 seconds with return value 0
Press any key to continue . . .
```
